About

Hi, I'm arcade👋

🔥 **I am a Software Engineer** More specifically as a Back End Web Developer. I also have my own startup called [Netmedia Framecode](#) which has started a business since 2018. I have completed my final education at Widya Mandira Catholic University. While I was at UNWIRA, I have participated in various off-campus activities such as Re-Cloud from Codepolitan(<https://codepolitan.com/>) and Alibaba Cloud Indonesia(<https://id.alibabacloud.com/>).

✂ **My Job** I started learning coding since I was in junior high school, when it happened that my uncle was studying at STIKOM and I was also learning how to create a website. Currently, I can create complex website-based applications such as administrative bookkeeping applications and others. In learning programming languages, I didn't go straight to the database management system stage, but started from how to design a website to make it attractive.

🚀 **Another life** I not only have skills in the programming world but I also learned how to be a video editor and photo editor.

🛠 Skills and experience

- PHP Native
- HTML, CSS, JS
- Dart, Flutter
- Laravel 8
- CodeIgniter 3
- Django/Python

Skills

Front-End

PHP

Java

HTML5

CSS 3

MySQL

Experience

Founder

Netmedia Framecode • June 2018 - Present

Netmedia Framecode is a website creation service that was created with the aim of helping UKM (Small and Medium Enterprises) in digitizing. We strive to make changes from conventional to digital systems as a form of increasing the effectiveness and efficiency of UMKM business processes and operations. With the digitization of UMKM, UMKM business actors change their business management from conventional to modern practices.

We are committed to creating wider business opportunities for UMKM to Go Global with digitalization.
